

## Colex Fotoba High Performance XL320

The Fotoba XL320 High Performance is the perfect solution for cutting flexible media up to 40 mil and capability of cutting a wide range of Textile/Fabric up to 130" wide.

### Overview

The Fotoba XL series cutters are super fast to eliminate the bottlenecks in your finishing department. A single cutter is capable of handling the output of several printers. The XL cutters use FOTOBA CUTMARKS to follow the edge of the image. Regardless of any feed misalignment, the XL Cutter will automatically realign itself to the edge of the printed image. The XL cutter will always produce square finished images even if the printer fails to print parallel to the media edge or if the printer fails to wind up the rolls squarely (telescoping). The XL320 can cut a 150 foot Roll in under 10 minutes!

### Features

The XL Series can handle media with a maximum thickness of 40 mil including polycarbonate, laminates and encapsulated media, photo paper, vinyl, self-adhesive vinyl, graphic arts film, duratrans, canvas and much more.

#### Characteristics:

- Self squaring to the edge of the image (X)
- Automatic tracking of the image edge (Y)
- Max linear speed 50 ft per minute
- Vertical slitters: single 8 mm double or adjustable double
- Adjustable cutting lengths and quantities for media conversions
- Memory channels to store different cut marks
- All mechanism controlled by stepper motors
- Automatic scanning of the cut marks
- Self sharpening blade system
- Accuracy +/- 1 mm (0.04 in.)

## Technical Specs

Model	XL320
<b>Media Handling</b>	
Max Roll Size Diameter	10"
Max Paper Width	130"
Min Paper Width	43"
<b>Weight</b>	
Net Weight	705 lbs.
<b>Dimensions</b>	
XL320 Dimensions	169" X 28" X 46" H
<b>Air Requirements</b>	
60 psi, .25 cfm	
<b>Electrical Requirements</b>	
110V
