#### **KENT 4 STATION LINEAR PNEUMATIC JIG SHUTTLE**

The shuttle can be adjusted to print 1, 2, 3, or 4 colours and is ideal for printing short run multi colour work as it only requires one fixture, unlike a transfer car or rotary table.

This was used on a PP 150 Pad Printer (Kent) but should be suitable for use on most of the Kent machines.

The shuttle is in good working order.

Also available is a flaming unit.

**YOM:** 1996 (approx)  
**LOCATION:** Hull  
**PRICE:** £1,200
